Don't listen to them (Saint Luke the Doctor)

[Ξένες γλώσσες / In English](#)

Image not found or type unknown

Don't be shocked when you hear what they say against the faith, because those who are doing the talking don't understand what it really is. You just remember always the basic principle that the early Christians knew very well. They considered people sad if they knew all the sciences but didn't know God. Equally, they thought those people were blessed who knew God but knew absolutely nothing at all about human affairs. Preserve this truth in your heart as the greatest treasure and continue on your way, looking neither right or left. Let's not lose our way because of what other people say about religion.
